

Beautify Golf Course Lakes and Ponds with **TLC** Golf Pond Treatment

Before Treatment

Seasonal golf pond algae problems present challenges for many superintendents. Sunshine combines with fertilizers, leaves, and clippings to cause algae blooms that are both unsightly in decorative ponds as well as problematic for irrigation systems. Finally, a solution is available that is non-toxic, non-hazardous, cost effective, and environmentally beneficial.

TLC Golf Pond Treatment is the safe and proven biological pond clarifier. TLC has been reformulated as an easy-to-use liquid concentrate that is simply dosed to the ponds needing treatment on a weekly basis. TLC has been used successfully throughout the USA and around the world for over 5 years. For a clear and biologically balanced pond, use TLC Golf Pond Treatment.

Frequently Asked Questions

Why should I use TLC? TLC is proven effective in 1000's of ponds worldwide. TLC clarifies your pond (including filamentous and "pea soup" algae), digests sludge, and eliminates foul odors. TLC is non-toxic, safe, and environmentally beneficial.

How does TLC work? TLC is composed of 100% natural, live bacteria that out-compete algae for nutrients. This causes the algae to starve, and the bloom is eliminated.

Is TLC Difficult to Apply? No! TLC has been reformulated as a liquid concentrate, and is ready to apply straight out of the gallon jug or 6-gallon pail.

What is the best time to apply TLC? For optimal results, start TLC treatment about one month before problems historically begin.

I already have an algae problem. Is it too late to start TLC use? No! TLC will clarify your pond regardless of a pre-existing problem. Excellent results are often seen as early as one week after first dose.

How can I get the TLC "Performance Warranty Quotation" for my ponds? Take just a few minutes and complete our TLC Performance Warranty Worksheet. Return it to us by fax or mail, and our technicians will supply you with a firm quotation, including all costs, procedures, and our exclusive guarantee.

TLC Golf Pond Treatment.**

With TLC Use!

"As the superintendent of the Windy Trails Air Force Golf Club, I have been very pleased with your product's results. I am very happy with the clear, algae-free water obtained without chemicals. I am also very happy that there is no harm to wildlife or fish that populate our ponds. Thank you for developing a safe and natural solution for my ponds. I look forward to working with you."

"I am writing to say how pleased I am with your product. I have used many types of chemical control, only to have algae grow back. With TLC, I have longer residual control, and the algae virtually disappeared without any harm to fish or wildlife. I am happy to recommend your product to golf course superintendents."
